

Amino-Abendtrunk®

With plant extracts, vitamins and minerals for sleep & relaxation

Restful sleep – a great start into the day

A peaceful sleep significantly contributes to our quality of life and general wellbeing. Falling asleep and sleeping through the night is thereby particularly important. Six to eight hours of sleep would be ideal, however, some people can only dream about that. In general, certain patterns of behavior can contribute to restful sleep, including a regular sleep- wake cycle, nicotine-, caffeine- and alcohol- abstinence before going to and comfortable rituals such as reading a good book or enjoying a cup of warm milk. As of late, there is another possibility to support the sleeping experience, namely the Biogena Amino- Abendtrunk. It contains selected amino acids, micronutrients as well as ashwagandha and hop plant extracts and thus can promote normal sleep.

Amino-Abendtrunk®:

- Ashwagandha root extract supports a normal phase of falling asleep
- Hops contributes to a normal sleep
- Magnesium and vitamin B6 support the normal functioning of the nervous system and the psyche
- Contains the amino acids glycine and L-tryptophan
- Vitamin B6 contributes to normal functioning of the immune system

Possible applications:

- To support the phase of falling asleep
- Nutritional contribution for sleep & relaxation

Bioavailable micronutrients in a pure form

- Only active ingredients
- Free of additives
- No colouring agents, artificial flavourings or covers
- Gluten-free
- Lactose-free
- Hypoallergenic
- 100 % vegan
- Quality tested
