

BIOGENA SPORTS - D3 & K2 liquid

Vitamin D3 & K2: an unbeatable partnership for athletes

In the world of sport, vitamin D and vitamin K are partners that contribute to the brilliant performance of athletes. They pull together when it comes to "bone work" - the maintenance of normal bones. In addition, vitamin K supports normal blood clotting, while vitamin D contributes to the normal function of the immune system and muscles - important factors for athletic performance. The interaction of both vitamins in the area of bone health cannot be denied and is also of great value for athletes. After all, the body is the capital of every athletically ambitious person.

BIOGENA SPORTS D3 & K2 liquid is the reliable choice when it comes to a smooth supply of vitamin D3 and K2. The duo active formula provides the two fat-soluble vitamins D3 and K2 in a ratio of 2:1. The daily dose of one drop provides 2000 I.U. vitamin D3 and 25µg vitamin K2. Vitamin K2 occurs with side chains of different lengths, which influence how well the vitamin is absorbed by the body. Menaquinone-7, abbreviated to MK-7, is by far the most effective variant of vitamin K2 and is used by us in the form of the branded raw material K2VITAL®.

In BIOGENA SPORTS D3 & K2 liquid, vitamin D3 and K2 are dissolved in high-quality MCT carrier oil made from coconut. The integrated pipette makes the drops easy to dose.

BIOGENA SPORTS D3 & K2 liquid - best friends during "bone work", best friends during training.

BIOGENA SPORTS D3 & K2 liquid

- Highly dosed vitamin D3 & K2 in a ratio of 2:1 (2000 I.U. D3 + 25 µg K2 MK-7)
- Branded raw material K2VITAL®: Vitamin K in its most effective form as menaquinone-7
- Optimum bioavailability of the fat-soluble vitamins
- High-quality MCT carrier oil made from coconut
- Neutral taste & easy dosing thanks to scaled pipette: 1 drop/day
- Product of the Cologne List®
