

Chlorella Pur C plus

Chlorella Pur C plus - high-quality Austrian chlorella combined with vitamin C

Algae have long been a valuable food in the history of mankind. For example, the Aztecs already knew about the properties of algae and used them as a source of plant food. In Japan, algae are still part of the daily diet and make a significant contribution to the supply of minerals, proteins, unsaturated fatty acids, fibre and valuable plant ingredients. Chlorella vulgaris is a very special freshwater alga. Particularly outstanding is its proportion of chlorophyll, which in contrast to other plants is distributed throughout the cell.

Biogena Chlorella Pur C plus contains a Chlorella vulgaris powder of the highest quality and purity, which is cultivated in a patented closed glass tube system in Austria. With this sustainable system, premium algae are produced according to the model of nature in a protected environment that excludes pollutants and impurities. The purest Austrian drinking water, sunlight and selected nutrients are sufficient for this high-quality algae product from local production.

Biogena Chlorella Pur C plus is a quality preparation made from high-quality Chlorella algae combined with concentrated vitamin C, which makes a meaningful contribution to protecting the cells from oxidative stress.

Chlorella Pur C Plus

- Contains high-purity Chlorella vulgaris algae from patented cultivation system
- With vitamin C, which supports the cells against oxidative stress and contributes to the normal functioning of the immune system.

Possible uses

- For the targeted short-term supply of plant-specific ingredients
- As a nutritive contribution to the protection of cells against oxidative stress and to support the immune system.

Bioavailable micronutrients in a pure form

- Only active ingredients
- Free of additives
- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Vegetable capsule shell
- 100 % vegan
- Quality tested
