

BIOGENA AESTHETICS

Collagen+ Essentials

Collagen+ Essentials is particularly attractive as a trial **pack, travel size or as a weekly treatment** - for that special glow! Compared to our existing bestselling product *Collagen+ Superior*, the formula has been slightly adapted - the attractively priced trial size invites you to get to know it.

Exceptional Glow inside out

Glow is radiance from the inside out. It is not only to be found in the genes or in luxurious skin care creams. Glow is the natural radiance that makes you feel confident, happy and beautiful at every stage of your life. A healthy lifestyle with sufficient sleep and a conscious diet as well as adequate hydration contribute to this glow.

Radiance at the point of science

Immerse yourself in the extraordinary world of Glow, where you glow from the inside out: A microdrink with a super-fruity cherry thyme flavor explosion, BIOGENA Collagen+ Essentials delivers the premium blend with the "+", that little something extra in the form of ingredients carefully selected with scientific expertise.

Collagen is the most common protein in the human body and is present in different types depending on the type of tissue. This is also the case in our skin: beneath the visible epidermis lies the dermis, which contains the fascinating structural protein collagen, which impresses with its exceptionally high elasticity. Together with elastin fibers, it stretches together to form a rubber band-like network structure that forms the inner "corset" of the skin. NATICOL® premium collagen mainly contains fish collagen type I peptides. It is characterized by top bioavailability and, as a by-product of responsible aquaculture, also sustainably conserves marine resources. New skin cells are constantly being formed in the epidermis and this process depends on a good supply of nutrients. Biotin and zinc have been investigated in various studies and their positive effects on skin health, including the maintenance of normal skin, have been proven. Zinc also protects cells from oxidative stress. Pomegranate extract, which contains polyphenols and ellagic acid, and hibiscus flower extract complete the premium preparation.

Collagen+ Essentials - developed to make you glow.

Collagen+ Essentials

- 5 g premium collagen Naticol® with unique fish collagen peptide profile
- Biotin and zinc contribute to the maintenance of normal skin.
- Zinc helps to protect cells from oxidative stress and has a function in cell division.
- Rounded off with pomegranate extract with polyphenols and ellagic acid as well as hibiscus flower extract
- Fruity drinking pleasure thanks to the natural aroma of cherry and thyme
