

Colostrum 300

First milk from cows for the intake of immunoglobulins

Bovine first milk with immunoglobulins

Colostrum is the milk produced in the first 24 to 36 hours after the birth of a mammal. This first milk is characterised by special ingredients, which include immunoglobulins, glycoproteins, polypeptides, enzymes, growth factors, essential amino acids, vitamins and trace elements. This high nutritional content ensures a good start in life for the newborn. The components of bovine colostrum are nearly identical to those of human first milk.

Biogena Colostrum 300: Nutritional support

Biogena Colostrum 300 contains bovine colostrum from certified farms in the European Union. The patented production process guarantees the preservation of the sensitive and valuable ingredients. By measuring and indicating the standardized immunoglobulin content (igG) of >18%, the natural composition of each batch is ensured.

Application area:

- For the targeted intake of immunoglobulins from colostrum

Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Fructose-free
- Vegetable capsule shell
- Quality tested

INGREDIENTS per daily dose	3 capsules	% NRV*
Colostrum	900 mg	-

* % OF NUTRIENT REFERENCE VALUES IN ACCORDANCE WITH EU REGULATION 1169/2011.
