

D-Biotin Formula

Micronutrients for nails, skin and hair

Biotin and other selected vitamins and minerals for skin, hair and nails Thick, shiny hair, clear skin and beautiful, well-groomed nails can say a lot about the health of a person; they mirror “inner” beauty. A balanced and healthy diet with plenty of fruit and vegetables supplies the body with important nutrients. In addition, special vitamins and mineral nutrients play an important role for our hair, skin and nails. Vitamin H, better known as biotin, contributes to maintaining normal skin and hair. Zinc helps maintain normal nails, whereas vitamin C supports the normal formation of collagen of the skin. Aside from the highly dosed biotin, Biogena DBiotin Formula also contains all these vitamins and minerals that are relevant for skin, hair and nails and also contains folic acid, iron and pantothenic acid. As a result, taking D-Biotin Formula can help maintain normal skin, hair and nails and makes an important contribution to your nutritional support.

D-Biotin Formula

- Contains a variety of micronutrients for skin, hair and nails
- Biotin and zinc contribute to maintaining normal skin and hair
- Vitamin C supports the normal formation of collagen for normal functioning of the skin
- Zinc is involved in maintaining normal nails
- Copper contributes to normal skin and hair pigmentation

Possible uses:

- For the targeted intake of selected vitamins and minerals that are relevant for skin, hair and nails and help to maintain them
- To support the normal collagen formation of the skin
- As an important contribution to normal skin and hair pigmentation
