

3-Salt Zinc 9 mg

Zinc from three compounds

It's all in the mix

3-Salt Zinc 9 mg is a unique combination of three good, bioavailable organic zinc compounds (zinc picolinate, zinc bisglycinate and zinc malate). The careful selection of the zinc salts was carried out by in-house product development. In addition to the approved zinc picolinate, zinc bisglycinate, the zinc salt found in malic acid was also chosen. Well tolerated and correctly dosed, it is suitable for daily zinc supplementation for both young and old.

The low daily dose of 9 mg is also taken into account for children and young people, who have a lower requirement than adults. The mineral is essential: The multi-talented zinc is part of more than 300 enzyme systems, and therefore, support various different functions of the immune system. Furthermore, it is also involved in the maintenance of skin, hair and nails and protects the cells against oxidative stress. The micronutrient preparation features the very good solubility profile of the three zinc compounds that are used. As is the case in other areas of nutrition, the following still holds true: It's all in the correct mix!

3-Salt Zinc 9 mg

- Contains three organic zinc compounds in a good bioavailable form
- With zinc malate, the zinc salt of malic acid
- Supports the immune system and protects against oxidative stress
- Plays a role in the maintenance of skin, hair and nails

Possible uses:

- To support the normal functions of the immune system and to provide protection against oxidative stress
- For children and young people, who have a lower zinc requirement than adults

Bioavailable micronutrients in pure form

- According to the pure substance principle
- Without colouring and flavouring
- Gluten-free
- Lactose-free
- Fructose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
