

fit@work® IMMUN Astaxanthin

fit@work® Immun Astaxanthin - companion of the immune system in demanding times

In modern everyday life, our immune system is often under great strain. Occupational and private exceptional situations and stress, as well as an unbalanced diet and too little exercise in the fresh air can cause our protective shield to shake. Especially in challenging times, however, we need a healthy, resilient immune system. Biogena, as a micronutrient specialist, has developed an innovative way of supporting your immune system: fit@work® Immun Astaxanthin combines the natural carotenoid astaxanthin from the green algae *Haematococcus pluvialis* with the immune assistants vitamins C and D, which support the body's own immune system - especially important in times of increased stress.

Biogena uses astaxanthin as its branded raw material *astafit*® - an Austrian raw material made from 100% natural astaxanthin of the highest purity and quality. Natural astaxanthin is extracted from the green algae *Haematococcus pluvialis* and is one of the carotenoids. One also speaks of the "diamond" among the carotenoids. The algae form the red natural dye as a protection against stress caused by lack of food or water, strong sunlight or extreme cold. Vitamins C and D serve as the basis for an efficient immune system. Vitamin C also contributes to the protection of the cells against oxidative stress caused by free radicals, which is e.g. produced in the course of the immune defence. Vitamin C can also reduce tiredness and fatigue.

fit@work Immun Astaxanthin thus offers a novel combination of the special carotenoid astaxanthin with the immune classics vitamin C and D. fit@work Immun Astaxanthin - your daily companion for an intact protective shield.

fit@work® IMMUN Astaxanthin

- Innovative combination of the immune-relevant vitamins C and D with the carotenoid astaxanthin
- Vitamins C and D contribute to the normal functioning of the immune system
- Vitamin C plays a role in protecting cells from oxidative stress and reducing fatigue and tiredness
- *astafit*® guarantees the carotenoid astaxanthin from Austrian algae breeding in consistently high quality and purity

Possible applications

- As a nutritional-physiological measure to support the immune system in times of increased stress
- As a contribution to the protection of cells from oxidative stress
- For use as required in the context of occupational health management
