LactroZym® 20.000

With the enzyme lactase in high concentration and L-glutamine

Lactase makes dairy products more digestible

Milk and dairy products are enjoyed by many people, but unfortunately they are not well tolerated by everyone. A special enzyme, known as lactase, is required to break down the lactose contained in milk. Lactase is produced in the small intestine and breaks down the lactose from food into its components so that they can be absorbed by the body. For people who have problems digesting lactose, the targeted intake of lactase improves tolerance.

Biogena LactroZym® 20.000: With lactose-splitting enzyme

Biogena LactroZym® 20.000 was developed to support people who have problems digesting lactose (milk sugar). Taken before meals, Biogena LactroZym® 20.000 improves the digestion of lactose. This increases the tolerance of milk and dairy products.

Function of the ingredient:

Lactase breaks down lactose into its components and thus improves lactose digestion in people who have problems digesting lactose.

Possible areas of application:

- For increased breakdown of lactose (milk sugar)
- For improved digestion and better tolerance of the lactose contained in milk and dairy products especially when consumed in large quantities

Bioavailable micronutrients in pure form

- According to the pure substance principle
- Without colorants and flavorings
- Gluten-free
- Lactose-free
- 100% vegan
- Vegetable capsule shell
- Tested quality

Biogena GmbH & Co KG

Strubergasse 24, A-5020 Salzburg, biogena.com

INGREDIENTS per daily dose	3 capsules	% NRV*
Lactase	600 mg	-
L-glutamine	300 mg	-

^{* %} OF NUTRIENT REFERENCE VALUES IN ACCORDANCE WITH EU REGULATION 1169/2011.

INGREDIENTS

Lactase**, L-glutamine, hydroxypropyl methyl cellulose (capsule shell).

RECOMMENDED DOSAGE

1 capsule taken prior to consuming a meal containing lactose (from dairy products). The daily amount, can be adapted individually to the daily dairy consumption. Recommended daily dosage up to 3 capsules. Lactose tolerance can vary and those affected should seek advice regarding the use of this enzyme in their diet.

NOTE

Food supplements in accordance with EU Directive 2002/46/EC

ADDITIONAL NOTE

** corresponds to FCC units (= ALU) per capsule: 20,000; per daily dose (3 capsules): 60 000

PACKAGE SIZE AND CONTENT

120 capsules (pack for 40 - 120 days), 42 g

Food supplement: The stated recommended daily intake must not be exceeded. Not a substitute for a balanced and varied diet and a healthy lifestyle. Store at room temperature, dry and protected from light. Protect from heat. Keep out of the reach of children. Suitable for diabetics.
