

Marie IMMUN®

Immune pioneer preparation with ideal combination of vitamin D3, vitamin K2 and magnesium.

In challenging times, reliable partners are the be-all and end-all. An important partner for our health is our immune system and therefore also the "sunshine vitamin" vitamin D. Vitamin D is an essential player in the immune system, it is mainly produced by sunlight in the skin. The weak sunlight during the autumn and winter months reduces the body's own vitamin D formation. Especially at a time when the immune system is particularly challenged, vitamin D supplementation can provide useful support for normal immune function. Vitamin D not only plays a role in the immune system, but also contributes to the absorption and utilization of calcium and phosphorus in the body.

In regular substitution, it is important to pay attention to an ideal interaction of certain micronutrients. One capsule of Marie IMMUN® contains 4000 I.U. vitamin D3, perfectly complemented by vitamin K2 and magnesium: vitamin K and magnesium, together with vitamin D, support the maintenance of healthy bones. Magnesium is also a significant cofactor in vitamin D metabolism.

With Marie IMMUN®, Biogena offers a smart pioneer supplement with an ideal combination of vitamin D3, vitamin K2 and magnesium. A single capsule contains 100 µg (4000 I.U.) of vitamin D3 plus 200 µg of vitamin K2 and 120 mg of magnesium. Thus, with the recommended intake of one capsule every other day, the daily dose of 50 µg (2000 I.U.) of vitamin D3, 100 µg of vitamin K2 and 60 mg of magnesium is comfortably achieved. The product name is Biogena's tribute to strong, confident female thought leaders such as Marie Curie, an impressive personality whose actions were totally dedicated to science.

Marie IMMUN® - in honor of a strong woman, for a strong product.

Marie IMMUN®

- Clever pioneer composition of the immune-relevant vitamin D with vitamin K2 and magnesium
- Vitamin D contributes to the maintenance of a normal immune system, normal muscle function, teeth and calcium levels in the blood

Possible applications

- As a nutritional measure to support the immune system in times of increased stress
