

MiraSkin® Gold

The beauty formula for the skin

The skin: the reflection of life & health

A face and its expressions often say more than a thousand words. It not only reflects the character of a person, but sometimes it even tells us about his/her history. Our skin changes in the course of our lives due to internal and external impacts, for example intensive exposure to sunlight, drugs or stress. An unhealthy diet and insufficient water can also affect the appearance and texture of skin because the skin cells depend on a good supply of nutrients due to their high level of metabolic activity. The sufficient uptake of vital substances can help maintain the vitality of skin for as long as possible and to care for it from within.

Biogena MiraSkin® Gold provides your skin with vitamin C from within, which supports the body's own collagen synthesis for normal skin function and helps to protect the cells from oxidative stress. Vitamin B6 supports normal protein and glycogen metabolism and the regulation of hormonal activity. Biotin contributes to the maintenance of normal skin.

This formula is rounded off with a special hyaluronic acid collagen complex (Dermial®), glucosamine (Kaneka NAG™), coenzyme Q10 in the active ubiquinol form (KANEKA UBIQUINOL™) and valuable extracts of pomegranate, green tea, olive leaf and grape seeds.

Physiological importance of some selected vital substances contained:

- Vitamin C supports normal collagen formation for normal functioning of the skin
- Vitamin C and vitamin E help protect cells from oxidative stress
- Vitamin B6 supports the hormonal regulation
- Biotin supports the maintenance of normal skin structures

Possible uses:

- For "skin care" from within
- To support and maintain normal skin
- For a targeted intake of valuable secondary plant substances
