

Omni Lactis® Metabolic Enterococcus

Your gut flora plays a key role in your well-being - and it carries weight!

Our intestinal microbiome (= intestinal flora) is a fascinating microcosm. With around 100,000 billion germs, it is not only one of the most densely populated places in the world, the intestinal flora is also unique to each of us due to its diverse composition. Studies show, for example, that the intestinal flora of slim and overweight people differs. Overweight people often have a lower diversity of species than their slim counterparts.

Omni Lactis® Metabolic Enterococcus contains 5 billion active bacteria (colony forming units) per daily dose and combines *Enterococcus faecium* SF 68 with five other premium bacterial strains. It also contains biotin, which supports your energy metabolism.

Good to know: Developed with the branded raw material Nordbiotic®, the formula contains study-based bacterial strains for a diverse intestinal flora. Easier living with a good gut feeling.

Possible applications

- For the targeted supply of the intensively researched premium strain SF68 *Enterococcus faecium* - coordinated with 5 other premium lacto and bifido cultures
- For the targeted supply of vitamin B2, which contributes to normal energy metabolism, normal metabolism of macronutrients and the maintenance of normal mucous membranes.

Bioavailable micronutrients in pure form

- According to the pure substance principle
- Without colorants and flavorings
- Gluten-free
- Lactose-free
- Fructose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Tested quality
