

Panto-H-Gena®

To support the fullness of hair

Micronutrients for the hair

Dull, brittle and full of split ends – sometimes you literally want to tear your hair out. Many men and women want beautiful and healthy hair but environmental conditions, excessive use of hair care products and heat damage it every day and causing it to lose its strength and shine. Beautiful hair needs more than just external care, but can also be supported actively through our diet. Naturally, this does not need to involve rocket science: simply taking selected micronutrients can make an important contribution to maintaining hair. An important vitamin is, for example, biotin (vitamin H), which supports the maintenance of normal hair. Biogena Panto-H-Gena® contains this important vitamin for hair in a high dosage, as well as pantothenic acid and the amino acid L-cystine. L-cystine is composed of two molecules of L-cysteine and can be found in keratin, which is the main component of hair. As a result Panto-H-Gena® offers a balanced spectrum of micronutrient and can actively support the fullness of hair.

Panto-H-Gena®:

- Biotin promotes the maintenance of normal hair
- Contains pantothenic acid (vitamin B5) and L-cystine

Possible uses:

- To support the fullness of hair
- For targeted supplementation with pantothenic acid and L-cystine

Bioavailable micronutrients in a pure form

- Produced according to the pure substance principle
- No colouring agents or artificial flavourings
- Gluten-free
- Lactose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
