

Phyto Biotika®

Plant power from East and West plus naturally contained vitamin C to support the body's own defenses

The body's immune system is often under great strain. And sometimes it also needs external support. This is where selected plant substances come into play, which have been used for centuries in herbal medicine to support the body's defenses.

Biogena Phyto Biotika® is based on a combination of traditional plant extracts from East and West: Vitamin C-rich amla extract (*Phyllanthus emblica*) from Asia is combined with thyme leaf extract (*Thymus vulgaris*) from Europe, cat's claw bark extract (*Uncaria tomentosa*, Cats-Claw) from South America, eucalyptus leaf extract (*Eucalyptus globulus*) from Australia and pelargonium extract (*Pelargonium sidoides*) from Africa. The mixture is supplemented by extract from the tragacanth root (*Astragalus membranaceus*), which is found throughout the northern hemisphere.

The plant extracts of tragacanth, thyme and cat's claw contained in Phyto Biotika® complement each other and the naturally contained vitamin C from amla extract supports the body's own defenses, especially in the cold and wet season.

Phyto Biotika®

- Vitamin C supports the body's own immune function
- Tragacanth root, thyme and cat's claw support the body's natural defenses
- With valuable plant extracts from East and West and natural vitamin C from amla

Possible applications:

- To support the immune system and thus the body's own defences.
- For support in the wet and cold season
- For the supply of natural vitamin C from Amla extract

Bioavailable micronutrients in pure form:

- According to the pure substance principle
- Without colouring, flavouring and coating substances
- Gluten-free
- Lactose-free
- 100 % vegan
- Hypoallergen
- Tested quality
