

# BIOGENA AESTHETICS

## Marine Collagen Powder +

### Exceptional Glow inside out

Glow is the radiance from within. It is not only to be found in the genes or in luxurious skin care creams. Glow is the natural radiance that makes you feel confident, happy and beautiful at every stage of your life. A healthy lifestyle with sufficient sleep and a conscious diet as well as adequate hydration contribute to this glow.

### Radiance at the point of science

Immerse yourself in the extraordinary world of glow, where you radiate from the inside out: A collagen powder with a super-fruity cherry thyme flavor explosion, BIOGENA AESTHETICS Collagen Powder+ delivers the premium blend with the "+", that little something extra in the form of ingredients carefully selected with scientific expertise.

Collagen is the most common protein in the human body and is present in different types depending on the type of tissue. The dermis, which contains the fascinating structural protein collagen, lies beneath the visible epidermis. Together with elastin fibers, it stretches together to form a rubber band-like network structure that forms the inner "corset" of the skin. The premium collagen NATICOL® contains mainly fish collagen type I peptides. It is characterized by top bioavailability and, as a by-product of responsible aquaculture, also sustainably conserves marine resources. New skin cells are constantly being formed in the epidermis, and this process can be supported by a good supply of nutrients. Biotin and zinc have been investigated in various studies and their influence on skin health, including the maintenance of normal skin, has been proven. Zinc also protects cells from oxidative stress. Pomegranate extract, which contains polyphenols and ellagic acid, and hibiscus flower extract complete the premium preparation.

Collagen Powder+ - designed to make you glow.

### Collagen Powder+

- 7.5 g premium collagen NATICOL® with unique fish collagen peptide profile
- With glycine
- Biotin and zinc contribute to the maintenance of normal skin
- Zinc helps to protect cells from oxidative stress
- Zinc has a function in cell division
- Rounded off with pomegranate extract with polyphenols and ellagic acid as well as hibiscus flower extract
- Fruity drinking pleasure thanks to the natural aroma of cherry and thyme
