

BIOGENA AESTHETICS

Skin Balance+

A balanced complexion

Beauty has many faces, it is individual and changeable. However, the desire for a pure, clear complexion is universal. However, stress at work or school, convenience food lacking in vital substances and hormonal chaos can throw our radiant complexion out of balance. Creams and lotions quickly reach their limits, however, because beautiful skin is not just based on the surface. It reaches into the depths - and radiates outwards from there. With this in mind, SKIN BALANCE+ enriches the BIOGENA AESTHETICS range with another exclusive product that cares for our skin and its sensitive balance from the inside out.

The specially developed premium formulation of selected vitamins, zinc, valuable plant extracts, beta-glucans and astaxanthin provides a range of important nutrients for the skin and, with its sophisticated composition, supports people in search of natural effortless beauty.

SKIN BALANCE+ - the art is in the detail

What makes SKIN BALANCE+ so special? The "+" in our product stands for that little bit extra that can be expected from the Austrian micronutrient expert BIOGENA. The exquisite ingredients have been carefully selected based on the extensive expertise of our many-strong team of scientists.

+ Vitamin C from three sources: Skillfully combined - with natural vitamin C from camu camu and amla extract and with buffered calcium L-ascorbate. Vitamin C is an important nutrient for the skin as it supports collagen formation for normal skin function.

+ Cell protection from within: Vitamin C, vitamin E and zinc help to protect cells from oxidative stress.

+ With beauty nutrients: Zinc from easily bioavailable zinc picolinate and vitamin A, which can be formed by the body from beta-carotene as required, support the normal functions of the skin. Vitamin A is involved in cell specialization processes, while zinc plays a role in DNA synthesis and cell division processes. These functions play a role in the formation and renewal of skin structures.

+ Selected premium plant extracts: With Boswellin® frankincense extract with a standardized content of β-boswellic acids, with grape seed extract (exGrape® SEED) with a high OPC content and with astaxanthin (ASTAFIT®), a carotenoid obtained from the green algae Haematococcus pluvialis.

+ Valuable beta-glucan: The researched branded raw material Yestimun® also provides beta-glucan, which is obtained from the cell walls of brewer's yeast (*Saccharomyces cerevisiae*).

SKIN BALANCE+ - for a balanced complexion+ from within

- Premium formulation for a balanced complexion from within
- With the three beauty nutrients vitamin A, zinc and vitamin C
- With vitamin C, vitamin E and zinc to contribute to oxidative cell protection, especially in the event of increased
