

BIOGENA SPORTS - L- Glutamine Sticks 5000

L-glutamine: building block of muscle tissue

L-glutamine is the main component of the pool of free amino acids in the blood plasma with a quantity share of about 20 %, whereby the highest concentration can be found in the muscles. Glutamine is therefore one of the most important amino acids in the human body and, as a building block of muscle tissue, it is significantly involved in protein synthesis, but also represents an important substrate for the cells of the gastrointestinal tract. During intensive training, the content of L-glutamine can decrease considerably, which is why supplementation can be helpful for people who want to optimise their training performance.

BIOGENA SPORTS L-Glutamine Sticks 5000 provides glutamine in its bioidentical L-form and is therefore an optimal source for additional intake to the daily diet and the body's own synthesis. Our premium raw material meets the highest quality and purity criteria. The L-glutamine is produced in a complex manufacturing process through the fermentation of glucose - the result is a vegan raw material with a purity of 99-100 %, which BIOGENA offers as a training companion in a high dosage of 5 g in practical READY-TO-GO sticks.

BIOGENA SPORTS L-Glutamine Sticks 5000 - the protein building block in powder form for daily supplementation during training.

BIOGENA SPORTS L-Glutamine Sticks 5000

- Contains the amino acid glutamine in bioidentical L-form
- Pure vegetable amino acid without additives
- Practical READY-TO-GO sticks in high dosage with 5 g
- Guaranteed highest purity and quality
- Product of the Cologne List®

Possible applications

- For the special needs of athletes
- For the targeted supply of the amino acid L-glutamine in convenient stick form

Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Fructose free
- Lactose-free
- Hypoallergenic
